

April 2023

# WHAT'S NEW

## Editorial Note

The April 2023 vintage is the last update of the COVID-19 Household Monitoring dashboard. No new further updates are currently planned. Users can still access the data and dashboard on our [website](#) and find additional data on high-frequency phone surveys on our [brief page](#).

The COVID-19 Household Monitoring dashboard was launched in October 2020 to provide timely and comprehensive information on the impact of the pandemic on households around the world. We thank you for your interest and support for this initiative over the past three years.

Total countries: **89** Total surveys: **423** Total indicators: **155**

## NEW DATA

**40** new survey waves

**3** new countries

 Tonga

 Timor-Leste

 Vanuatu
